10mm Fully Frameless Shower Screens are the "ultimate" design for the modern bathroom.

### Correct Measurement Essential

Fully Frameless Shower Screens demand extremely accurate measurement - they have to be "mm perfect". We take particular care with:

- *Height* - we generally aim to "tie in" the height with a tile grout line, or door/window frame
- *Plumb/Levels* - how far out are your wall & floor tiles? Even a 2mm variation from true has to be taken into consideration
- *Door Size/Position* - which is the best way to open your doors considering the position of taps, towel rails, doors, etc.?
- *Hinges* - how will the weight of the door be supported?

- Unsurpassed design and appearance for top quality bathrooms
- Top Quality "Opus" Hinges (we do not use cheap imports) and brackets

([www.opushardware.co.nz](http://www.opushardware.co.nz))

- Doors can be fitted with straight & tapered knobs, and "C" and "D" handles
- Fittings/hinges can be ordered in Chrome, Satin and "Gold".

### How Long Does it Take?

It takes between 2 and 3 weeks to manufacture and install your "custom made" Shower Screen.

### What Does it Cost?

A "2 Panel" Front and Return Panel, 1900x900x900mm costs approximately \$3600 incl. GST.

### What Experience do we Have?

We have been designing and installing 10mm Fully Frameless Shower Screens for over 25 Years.

### Water Loss Potential?

Please refer to the "Water Loss Guide" on our website.
