The **New** Corner Entry Sliding Shower Screen provides easy entry even when toilets and vanities are in close proximity.

Both dual sliding doors have a full length PVC coated magnet which ensures positive closing and impressive water resistance.

Correct Measurement

To achieve a great finished custom made product it is imperative that your Shower Screen be measured correctly. We take particular care with:

- **Height** - we generally aim to "tie in" the height with a tile grout line, or door/window frame
- **Plumb/Levels** - how far out are your wall & floor tiles? If they vary by more than 2mm we manufacture your Shower Screen "out of square".

- Ideally suited to "tight" bathrooms/ensuites where a vanity or toilet restricts other designs
- Heavy duty non-corrosive components used throughout
- The innovative design and heavy duty rollers ensure smooth operation of the doors
- The smooth design of the aluminium sections and components ensure easy cleaning
- Available in Grade A Safety Glass, Clear & Obscure Patterned
- Frame colours include Bright Silver, White & Almond (components only available in Grey, White and Black).

How Long Does it Take?

It takes between 1 and 2 weeks to manufacture and install your "custom made" Shower Screen.

What Does it Cost?

A Corner Entry Sliding Shower Screen, 1900x900x900mm costs approximately \$1040 incl. GST.

Don't the Doors Jamb?

The Corner Entry system is developed from the proven Series 9300™ Sliding design.

Water Loss Potential?

Please refer to the "Water Loss Guide" on our website.
